

MAG-JET VALVE

3.0 - 20 GPM, 2,000 - 5,000 PSI

Mag-Jet Makes Pump Conversion Easy

Converting a standard high-pressure pump to a jetting pump can be easily done with the use of Mag-Jet valves from Cat Pumps. With the Mag-Jet valve, any pump can be converted to supply the high-pulsating water often required for sewer and jetting applications. The Mag-Jet valve eliminates the traditional dry pumping chamber and the possibility of dead-heading the pump. This prolongs the life of the pump seals, reducing maintenance and downtime on jetter pumps.

Cat Pumps offers a complete line of Mag-Jet valve assemblies to cover a variety of plunger pump models. See back page for a complete listing. Trust Cat Pumps to build durable products to keep equipment running longer. Nothing outruns, outlasts, and outperforms Cat Pumps products.

Features

- Lightweight, compact design
- Easy installation to inlet valve plug
- Stainless steel internal components
- Convenient handle permits easy conversion from cleaning to jetting

Applications

- Sewer cleaning
- Drain cleaning
- Tank cleaning
- Pipe cleaning
- Hydrostatic testing

Drive Type and Duty

Hydraulic-Driven

3.0 to 11.0 gpm • Up to 3500 psi

Clutch-Driven

3.5 to 8.0 gpm • Up to 4000 psi

Medium-Duty

5.0 to 15.0 gpm • 2000 to 4000 psi

Heavy-Duty

15.0 to 40.0 gpm • 2000 to 5000 psi
